Education over a period of time has undergone a drastic change evolving from academic centred learning to new emphasizing on holistic development of individuals; training them to deal effectively with the demands and challenges of everyday life. We, in NCS focus on imparting life skills ‘a behaviour change’ or ‘behaviour development’ approach designed to address a balance of three areas; knowledge, attitude and skills.

Given the rapid change in our world, the ability to adapt and adjust is critical to success. Children need to be groomed right from the grass root level to accept victory and defeat gracefully while facing stiff challenges in life. Our task of education is to implant a will and facility for learning and this can be achieved through life skill education (For which we need your co-operation and collaboration as a parent). Then we can produce not learned people but learning people. Then, we can truly have human society which continues to learn every single day.

I request you to take greater interest in the affairs of your children, involve yourselves in their day to day activities with more enthusiasm and give them proper guidance. Please ensure that your ward does not bring Mobile phones, I-Pad, Pen-drive, costly and fancy items etc. to school, otherwise they will be confiscated and will not be returned at all. Check exposure to media with overdoses of violence in words and language.
