School, the temple of wisdom and knowledge, provides a special environment for developing qualities of life through various activities with an objective to develop every child's all round development.

The session 2016-17 was a vibrant one with a plethora of activities which helped our students to exhibit their inherent skills and talents. The inter-house/ inter-school activities/ competitions were a platform to unlock the creativity and potentials of the young inquisitive minds and give them opportunities to win laurels for the school.

Let us always remember that the human mind is the cradle of creativity, transcendence and thoughts. It is like a computer which furnishes you with ideas and solutions from the data you feed into it. Therefore, feeding your mind with good, positive, elevating, constructive thoughts will surely lead to outstanding outcomes. Everything that happens in your life begins as a thought or with a thought. Always nurture happy, constructive and positive thoughts within your mind as these will help keep your mind pure, serene and responsive. Good thoughts have given rise to great ideas and discovery, thus be courageous to think differently, daringly and constructively. Sowing good seeds will allow you to reap a good harvest.

We train our children in the spiritual path, to be environmental friendly and to be less consumeristic and materialistic. Children are the promise of tomorrow, we dream to nurture them in faith and goodness.

Dear Parents, do strive to inculcate values and morals in children. Jesus always had a very special love for children and blessed them. When the young minds are tender it is easier to sow seeds of love, peace, respect, truthfulness and harmony. Only the future generations can herald a better society and better world.

We desire to inspire others through our actions, promoting an inclusive culture where all feel loved and respected, working in synergy with great passion for the building up of our nation and, above all, the kingdom of God in this world.
